

## CCHF Interactive Session

### GROUP 7 - BUILDING SYSTEMS

**This session is all about ideas and thinking outside the box. There are no right or wrong answers. We have divided the groups up into multi-disciplinary groups to exchange perspectives.**

#### **Instructions:**

Identify a scribe who will be a participant, as well as take point form notes. Please write neatly as these notes will be used for compiling from all groups and be disseminated following the conference.

The notes should identify the 'voice' of the expert (architect, healthcare exec, engineer, vendor etc...) Not the individual name /company.

There are two questions aim to spend 10 minutes on each question.

When the time is up, each group will identify one or two main ideas that came out of your discussion. There will be some opportunity for comment clarification by the audience.

Thank you very much. We will be very interested in your feedback from this session on our conference survey.

#### **Questions**

- A. Building systems (mechanical, IT, sustainability, etc.) can be tailored for specific building types. Are we allowing emerging innovations to help create our current health care environments?

It is struggle to keep up with how quickly things change. Instead of layering technology in how can we better partner to outsource and tap into technology as it is rapidly changing.

Not always at the forefront of patient centred design.

- B. How can innovative solutions in systems technology and implementation inform health care delivery?

Educating ourselves needs to be a priority. New collaborations need to be formed that include big data, reliance on experts, internet of every things (people, places).

Building in flexibility to accommodate future innovation

Innovation in thinking needs to support innovations of things.

Better engagement of staff P3 and other stakeholders.
